

# ASHIWANI KUMAR

## Linux DevOps Engineer | Infrastructure & Cloud Automation

Abu Dhabi, UAE +971-566182303 ashvanikumar109@gmail.com [linkedin.com/in/ashivanikumar](#)

**DevOps Engineer** with 7+ years of experience applying software engineering principles to infrastructure automation, managing the full stack from bare metal to containers and applications. Proficient in Python-driven infrastructure-as-code with extensive experience in Kubernetes, open-source cloud platforms, and scalable automation solutions. Proven track record of building secure CI/CD pipelines, implementing DevSecOps practices, and managing multi-cloud environments across UAE and international markets.

### KEY HIGHLIGHTS

**7+**

Years DevOps  
Experience

**CI/CD**

DevSecOps  
Pipeline Delivery

**K8s**

Kubernetes &  
Helm Charts

**AWS**

Certified Solutions  
Architect

### CORE COMPETENCIES

#### CI/CD & AUTOMATION

- Jenkins, ArgoCD, GitLab CI
- GitLab CI, GoCD, CircleCI
- Terraform, Ansible, CloudFormation
- Python, Bash, Groovy
- Puppet, Chef

#### CLOUD & CONTAINERS

- AWS (EC2, S3, IAM, Lambda)
- Kubernetes & Helm Charts
- Docker, Serverless Framework
- VMware, On-Premises Infra
- Route 53, Load Balancers

#### SECURITY & MONITORING

- Grafana, Prometheus, Zabbix
- SonarQube, Nessus, Qualys
- Splunk, ELK Stack
- SIEM Systems, New Relic
- DevSecOps & Compliance

### PROFESSIONAL EXPERIENCE

#### Astek Middle East (Client: Idemia)

##### Linux DevOps Engineer

Abu Dhabi, UAE

January 2024 – Present

- Currently based in Abu Dhabi, UAE**, working on the UAE ICP (Federal Authority for Identity, Citizenship, Customs & Port Security) programme — handling airport infrastructure projects across UAE airports and also supporting Muscat International Airport, Oman
- Designed and maintained CI/CD pipelines** for web and mobile applications using Jenkins and GitLab CI, enabling efficient automated deployments
- Integrated security practices** into CI/CD pipelines using Jenkins and GitLab CI, achieving compliance with international standards
- Implemented Infrastructure as Code** using Terraform and Ansible for consistent and secure deployments across environments
- Deployed and managed Kubernetes clusters** for AI applications, utilizing Helm charts for automation, scalability, and streamlined configuration management across multiple environments
- Conducted regular security assessments** and implemented automated vulnerability scans using SonarQube and Nessus
- Integrated SonarQube and Nexus IQ** into CI/CD pipelines, achieving enhanced vulnerability detection, license compliance validation, and continuous code quality governance
- Managed containerized microservices** using Docker and Kubernetes, implementing GitOps workflows with ArgoCD for automated deployment and rollback strategies
- Configured AWS cloud infrastructure** including EC2, S3, Route 53, IAM policies, and Lambda functions, ensuring high availability and cost optimization

- **Collaborated with development teams** to implement CI/CD pipelines with integrated security checks using Jenkins and SonarQube
- **Managed Linux server infrastructure** across on-premises and cloud environments, ensuring optimal performance and security
- **Configured cloud environments** on AWS and Azure, optimizing performance and cost-efficiency across multiple services
- **Optimized Electronic Medical Records (EMR)** systems ensuring high availability and compliance with Department of Health (DOH) standards
- **Implemented automated monitoring** using Grafana and Prometheus, and set up logging and alerting with ELK Stack

- **Managed Linux server environments** for international clients in telecommunications, ensuring high performance and reliability
- **Automated server provisioning** and configuration using Ansible, reducing setup times by 60%
- **Implemented security measures** and compliance protocols to protect client data and meet international standards

- **Managed SUSE Linux and VMware environments**, optimizing virtual machine configurations for resource efficiency
- **Collaborated with SAP Basis team** to integrate IT solutions with business operations ensuring seamless functionality
- **Implemented automation scripts** to streamline system processes, improving operational efficiency by 40%

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

AZ-400 – Microsoft Azure DevOps Engineer Expert

AZ-104 – Microsoft Azure Administrator Associate

RHCSA & RHCE – Red Hat Certified

CCNA – Cisco Certified
